Dear Miss Kober:-

Congratulations on your paper on the "adze" tablets, which I have just received. You Cretanists, or whatever they call you scholars in that field, seem to have made considerable progress, although not being familiar with the literature I can only form a faint idea of the progress.

It begins to look as if I should never get into the study of Minoan, as I have enough work in other fields already laid out to occupy me for the next ten years without interruption and at present war work takes up so much of my time, I can hardly accomplish anything linguistically.

Thank you for the additions to my bibliography however. The indebtedness you mentioned is all on my side.

Sincerely
Robert Schafer
