October 31, 1952

Dr. G. Gunter, Acting Director
Institute of Marine Science
The University of Texas
Port Aransas, Texas

Dear Dr. Gunter:

Finally I had time to check on the new oyster proposition which you wrote me about. The report was garbled. The article by Korringa is merely a review of the present status of Gryphaea versus Crassostrea and of the pertinent literature. Incidentally, Korringa "prefers to follow Ranson" until an official decision is made.

Best regards.

Sincerely yours,

H. B. Stenzel
Geologist
