World Book Company, Yonkers-on-Hudson 5, New York	Lone Star

OUTLINE OF PROCEDURE FOR ADOPTING TEXTBOOKS

When texts are to be adopted under the provisions of the Textbook Law or when a contract is about to expire, the Chairman of the State Board of Education gives public notice two months in advance of the meeting at which the adoption is to be made. This "Proclamation Advertising for Bids" lists the subjects and grade levels for which books will be considered, together with other directives the State Board desires to make in regard to bids that will be submitted. Following the publication of this proclamation interested publishers may secure complete information from the Textbook Division about requirements for filing samples, forms to be completed, and dates upon which such items must be filed.

The second Monday in November is the date set by law for annual adoptions, but the State Board may consider adoptions at such other times as it may be called together by the chairman for this purpose.

Each year at its meeting on the first Monday in May the State Board of Education selects fifteen persons from the list recommended by the State Commissioner of Education to serve as members of the State Textbook Committee. These appointees serve for a term of one year. Each person shall be an experienced and active educator engaged in teaching in the public schools and no two members may be from the same Congressional District. A majority of the members are to be classroom teachers.

It is the duty of the Textbook Committee to study the books offered for adoption and recommend to the Commissioner of Education a complete list of textbooks which it approves for adoption at the various grade levels and in the various subjects for which bids have been called. Although the Commissioner may remove books from the recommended list (provided he does not reduce a list to a single adoption), he cannot add any book to the list.

The Commissioner submits the recommended list to the State Board of Education, which in turn may remove books, but the board may not place any book on the list that has not been recommended by the Commissioner; neither may the board reduce a list to a single adoption. The contracts awarded by the State Board of Education are made for varying periods and books covered by such may be gradually introduced at the discretion of the board.

Books to be used in individual school systems are recommended by a multiple-list committee appointed each year to examine and recommend the texts best fitted to the system's needs. Common and rural high schools use selections made by the committee appointed by their county superintendent, but each independent school district has its own multiple-list committee. The report made to the Textbook Division by a school's officials is final; no changes or additions are permitted for the subjects included on a report. After a school is supplied with selected texts, these texts are to be used for the duration of the contract period; it is not permissible to return some copies in order to secure replacements of another title, even though that title may have been selected by the school committee.

Complete information regarding quotas, gradual introduction plans and regulations about the distribution of textbooks may be found in the Annual Textbook Inventory, Report and Requisition Form, or in the Handbook for Local School Officials and in the communications sent out from the Textbook Division Office.

TEXAS DEPOSITORIES (through which state-adopted books are distributed).
