Dr. Kenneth E. Caster
Geology Department
University of Cincinnati
Cincinnati, Ohio 45221

Dear Kenneth:

Thank you for sending me your three separates. As it is, I had read some of them already, with great pleasure. Your personality comes through very nicely in some of them. Good for you, because you have an interesting beret-covered personality.

You and Wyatt Durham are doing the most important work in the Carpoidea, and it will be a landmark for many years to come, even if others should come forth with different ideas.

It was good talking to you at St. Louis.

Best wishes.

Sincerely,

H. B. Stenzel

HBS: gwy

Enclosures: Separates The University of Texas is going to send you my work on the Stone City pelecypods.
