November 18, 1957

Dear Dr. Stenzel,

When I last wrote you, I had not heard from Dr. Hedberg, and so I did not receive your September letter until just before I left for the Continent about ten days ago. Now that I am back in London, I am writing you another L.P.L. about fossils, this time about the Waltham specimens you mentioned in your letter.

I have had two very cordial letters from Dr. Thomas of the British Museum. The second one advises me to write to Dr. White (head of department) giving him the fullest possible description of the specimens. He said he doubted that Dr. Spott had kept any written records about them in the Museum files. I doubt it too. I do not even know whether he had labeled the fossils or not, but he was usually very careful about labeling material he had identified, and worked with.

I am taking advantage of your offer to furnish me material information about the Waltham types. I imagine I am going to need all the information I can get. So I shall deeply appreciate your sending

the as that as I can all the, in
 full from here. I am very
 get them back into his collection.
 The Museum has some duplicates
 fossils to replace. As the list you
 me to an, assuming that you got
 letter asking for information about what
 the N. G. I. (red) will do only there as
 will do in Cambridge. I think after all,
 I did not get in time and very few
 specimens of limited time and very few
 comments. I will write in the fully about
 that I may have to get this or little
 later. I will in a week to get this in the
 mail. Kindly, Mary Grace Adams
