Dr. L. R. Cox
British Museum (Natural History)
Cromwell Road
London S. W. 7, England

Dear Dr. Cox:

Thank you very much for the package of separates recently sent. I am happy to be able to keep up with your work in this fashion.

It was very good of the Mollusca group at the British Museum to send me a Christmas card. It is a gesture of friendship I appreciate very much; please express my thanks to everyone who signed the card. My stay at the British Museum is still a shining memory; the hospitality of your group was really exemplary. Too bad I did not have more time to spend studying at the Museum.

By separate mail I am sending twelve specimens of Baculites taylorensis Adkins, W. S., 1929, Some Upper Cretaceous Taylor ammonites from Texas: Univ. Texas Bull. 2901, pp. 203-205, pl. 5, figs. 9-11. The beds containing this ammonite are now known to belong to the Pecan Gap Chalk of the Taylor Group, Campanian probably; the specimens are all exact topotypes. I hope this donation to the British Museum will be useful to someone.

With warmest regards,

Sincerely,

H. B. Stenzel
