Mr. Dennis Curry  
Eastbury Grange, Watford Road  
Northwood, Middlesex  
England

Dear Mr. Curry:

Thank you very much for sending the report on "The Geology of the Western Approaches of the English Channel." You might be interested to know that your previous paper on the sea floor of the Channel was reading assignment for my class in stratigraphy at Rice University. The Channel is the best example of an angular unconformity and transgression in the making.

Best wishes,

Sincerely yours,

H. B. Stenzel
