

December 13, 1961

Mr. Richard A. Davis, Jr.  
c/o Geology Department  
The University of Texas  
Austin, Texas

Dear Mr. Davis:

Thank you for sending me the so-well preserved fossil crab. It is Harpactocarcinus americanus Rathbun, male, which is common in the Wheelock but has never been found in the Stone City. You know I could use some well preserved Texigryphaeas from the Grayson marl [T. roemeri (Marcou) = T. graysonana (Stanton)].

Best wishes.

Sincerely yours,

H. B. Stenzel
