SCHOOL OF GEOLOGY

Mr. H. B. Stenzel, Geologist
Bureau of Economic Geology
University of Texas
Austin, Texas

Dear Mr. Stenzel:

I have been following your recent writings on the stratigraphy of the Gulf Coast with considerable interest, particularly those articles which appeared in the University of Texas publication 3945 and in your more recent article "New Zone in Cook Mountain Formation, Crassatella texalta Harris - Turretella cortezi Bowles", which appeared in volume 24 of the Bulletin of the American Association of Petroleum Geologists.

I wonder if you would be so kind as to send me reprints of the above mentioned article and the following articles which appeared in University of Texas publication 3945:

New Eocene Brachiopods from the Gulf and Atlantic Coastal Plain

Tertiary Nautiloids from the Gulf Coastal Plain

The Yegua Problem

Also reprints by H. B. Stenzel and F. E. Turner on "The Gastropod Genera Cryptochorda and Lapparia in the Eocene of the Gulf Coastal Plain" and "Turretellidae from the Paleocene and Eocene of the Gulf Coast".

Although I have not nearly as many reprints to offer in exchange, I am taking the liberty of sending you some of my own in which you might find some interest.

Very truly yours

H. N. Fisk
Assist. Prof. of Geology
