Dr. V. G. Steuzel
Shell Development Co.
P.O. Box 481
Houston 1, Texas

Dear Dr. Steuzel:

Mrs. Kinglea called sometime ago and said you were working on oysters and might be in need of some specimens.

Since we've always saved all the complete (both valves) specimens we've found there are now 28 species of Texas Cretaceous material in our collection, and we have many duplicate complete specimens.

If you need any of the material we have or care to look at it we will be glad to make it available.

Sincerely
Paul & Alice Frost
