Dr. H. B. Stenzel,
University of Texas,
Bureau of Economic Geology,
University Post Station Box B,
Austin 12, Texas.

Dear Dr. Stenzel:

Thank you for your note of April 29, concerning the Long-Bell #1 and Youngblood #1 wells of the Shaffer Oil and Refining Company in Grant County, Arkansas. I already have copies of the logs of these wells, including a special paleontologic report prepared by Mrs. Plummer. These I obtained from the Arkansas Geological Survey. They are good logs and of particular interest because of Mrs. Plummer's micropaleontologic work. They are probably worth using, particularly if we can get Mrs. Plummer to bring the fossil names up to date. I will write to her requesting this and also requesting permission to publish the information.

I enjoyed our brief talk the other day in Washington and also am looking forward to the opportunity of working with you.

Sincerely yours,

Mackenzie Gordon Jr.
