

UNITED STATES
DEPARTMENT OF THE INTERIOR
GEOLOGICAL SURVEY

5.10 Town - Texas -
to Dr. C. S. Stryker -

Dear Doctor Stryker -

Did you finally receive the
books and did I answer your
question about the Idiocyssa
and the spider crab. I'm afraid
not. I'm so sorry about the
delay in the books - I supposed
of course they had been sent.
The last two months that I
was in Washington, I spent
my entire time at the museum -
and my communications
with the Survey were entirely
by telephone which is never

very satisfactory to me -

No, I do not know of any other Hercoglossa from the Claiborne - there is of course the Clivia first referred to sic sac. Miss Rathburn could doubtless tell you about the spiders etc. - I don't even try to be informed on that group - I'm sorry to be so uninformative. With my heartiest good wishes for your holiday season -

Very sincerely yours -
Julia Gardner -
