GEOLOGICAL SURVEY 25 April

Dear Doctor Stenzel -

We certainly appreciate your permission to use your good work on the Texas traps. I'll ask later the right price to the rock maps be sent you after the series have been trains found so there will be no danger of using material which you wish to consider confidential. If you didn't get your grant, I'll be awfully sorry. I know from Doctor Doornick's Secretary that requests come in a deluge

GEOLOGICAL SURVEY

and that practically none
of the previous faults were
continued. The Survey is
drawn in grief and steeped
in war these days. I hope
the Fergusons are leaving you
in some sort of peace and
security.

Yours very sincerely
Julia Gardner

Yes, indeed, I shall be in
Washington next summer,
I trust officially, and shall
be most happy to do what
I can in making the col-
lections useful to you.
