

May 10. 1933.

Dr. Julia Gardner  
U.S. Geological Survey  
Washington, D. C.

Dear Doctor Gardner:

Please find enclosed map. The Weches outcrops in Leon County are very well copied. The only thing that might be added are some of the larger outliers west of Flynn and west of Concord.

The map needs some adjustments in the outcrops of the Crockett. You will find a small part of the basal Crockett contact on my large scale Leon County map.

In Brazos County one could add College Station. The Jackson contact in Brazos County is drawn on the basis of my present knowledge. I am very sorry that I did not succeed to draw this map neater.

Very sincerely yours,

H.B. Stenzel.
