GEOLOGICAL SURVEY

WASHINGTON

404 U. S. National Museum,  
January 10, 1940.

Dr. H. B. Stenzel,  
Bureau of Economic Geology,  
The University of Texas,  
Austin, Tex.

Dear Doctor Stenzel:

I was very glad to receive your letter of January 7. The meetings seem so far afield this year, not only because Chicago is a long way off but because they will probably be concerned chiefly with pre-Tertiary problems, that I have not considered going to them. Each year I plan to do my work in south Texas early in the season and escape the extreme heat, and each year I have been disappointed. If this season is no exception, there may be some time later in the fiscal year that will be convenient for us both.

With my best wishes for your work in Houston County and to Mrs. Stenzel and the Misses Stenzel when you see them,

Sincerely yours,

Julia Gardner
