Dr. H. B. Stenzel  
Bureau of Economic Geology  
Austin, Texas

Dear Dr. Stenzel:

While in Houston, you spoke to me regarding some one working up the Claiborne forams of Leon County. If you have been unable to get anybody to do this, we might undertake it if you will give us a long, long time. We would not care to do it unless we could get a section in such shape as to permit us to check-list the vertical range.

We hope either this spring or summer to get around to check-listing the Claiborne portion of our Ray No.39, which will give us a good idea of what to expect in the field. *l. c.*

If you have found somebody to do this work, so much the better, as we have plenty of other troubles.

Kindest regards,

  
M. C. Israelsky
