JUNE 15, 1951

Dear Henry:

May I felicitate you on the recognition of your perspicacious sagacity or vice versa. I refer to Science, vol. 13, no. 2945, June 8, 1951

Only you scholars of the classics can rightly enter the arena.

Jerry got back from Korea several weeks ago. Has hopes of being discharged.

Chas. Merriam is going back with the Survey, so the Palo Alto job will be vacant. I suggested you, but would advise you not to take it if offered. But I doubt it will be, as they consider themselves overloaded with Full Prof. and Associates. Merriam was damn enough fool to come as an associate.

I gather from the grapevine (not from you) that Mrs. Plummer's collections have gone to Ithaca. Unfortunate I think. They belong in Austin and if not there Washington would be best as they would be taken care of.

Keep out of the East Texas jails.

Best wishes,
Muriel
