

May 26. 1933.

Mr. Ralph W. Jackson  
Route No. 1.  
Cambridge, Md.

Dear Mr. Jackson:

The parcel of books arrived safely today. You may be pleased to know that I am very happy to have these books. One can not get any books here as there are no second hand book stores of any value in Texas. Please find enclosed check for \$ 11.60 in payment for the books.

I sent this morning a small parcel of live snails to you. The 2 specimens in the vial (1) are from north of Beaverdam Creek, in W.A. Thomason 66 $\frac{1}{2}$  acres, Hiram H. Hillelions survey, Leon County, Texas; under limestone boulders; July 1932.

The other specimens are from (2) behind the Experiment Station Building, on campus, College Station, Texas; in dug holes covered by boards; May 24. 1933.

I hope these specimens will be of use to you.

Very truly yours

U.S. Stenzel.
