Dr. Heinz A. Lowenstam  
Department of Geology  
The University of Chicago  
Chicago 37, Illinois

Dear Dr. Lowenstam:

I am not at all familiar with the collecting in the Selma chalk of Mississippi and cannot help you in this matter. There are plentiful belemnites in the Cretaceous of New Jersey. Look up Stuart Weller's "Cretaceous Paleontology of New Jersey" 1907, for locations to collect from.

Sincerely yours,

H. B. Stenzel  
Geologist
