Professor H. B. Stenzel
Department of Geology
Louisiana State University
Baton Rouge, Louisiana 70803

Dear Professor Stenzel:

Norman Sohl asked me to reply to your letter of April 20th asking about a citation for a four page paper with plates which Professor Kh. Kh. Mirkamalov of Tashkent sent to you by registered airmail.

To the best of my knowledge, what Professor Mirkamalov sent to you is the text and illustrations of a talk which he gave to the Moscow Society of Naturalists on May 16th, 1969. I would classify it either as a manuscript in preparation or a written communication. If he did not tell you where it is to be published, it cannot be listed as being in press.

A xerox copy of Professor Mirkamalov's abstract of the paper is enclosed. I would cite the abstract as follows:

Mirkamalov, Kh. Kh., 1969, Ob ob'eme vida Rhynchostreon columbum (Lam.) i ego rodovoy prinadlezhnosti (abstract): Moskovskoe obshchestvo ispytateley prirody byulletin, otdel geologicheskii, tom 14, vyp. 6, p. 150-151.

We are glad to learn that your oyster volume is nearing completion. We hope to see it in print this year.

Sincerely yours,

Marjorie G. Arnold, Geologist
