Mr. Philip E. Lamoreaux  
U. S. Geological Survey  
P. O. Box 2033  
University, Alabama

Dear Phil:

Thank you for your recent letter and the bulletin on Choctaw County. I am really enjoying the reading of that report. It is very fine and useful.

My class in Cenozoic Stratigraphy is going to take a field trip to Alabama during Easter. We shall leave here on Thursday, April 10, at 4 or 5 p.m., and have to be back by Tuesday morning, April 16. Last year our route was Vicksburg--Jackson--Meridian--Butler--Claiborne. I hope you can be with us this Easter; it would be a good occasion for a reunion and the students and I would profit from your guidance. Do you think you can make it? Should I write an official letter to your boss? It would really be of advantage to the students and the U.S.G.S. for the students to become acquainted with the work the U.S.G.S. is doing. These students are all geologists and seniors or graduates. It is an excellent group this year.

How busy is Lyman Toulmin? Could he be counted in on this proposition?

Sincerely yours,

H. B. Stensel  
Geologist
