Dear Doctor Ladd:

Pres Cloud came through Austin recently and told me that there is a position open at Georgetown University. I have come to the conclusion that it would be best for me to make a change and am interested in a possible place at Georgetown.

Conditions here are entirely satisfactory and Lonsdale thinks very highly of me, perhaps more highly than I deserve. However, the set-up is such that any future advance is highly unlikely. The present administration here rarely sees beyond the immediate campus and has no interest in those who do not teach. I believe I am still too young to consider my career as closed.

Just what the position at Georgetown is I do not know. Hence I would appreciate it if you could outline it to me.

With best regards,

Sincerely,

H. B. Stenzel  
Geologist
