

THE TULANE UNIVERSITY OF LOUISIANA
NEW ORLEANS
GEOLOGY

February 13, 1941.

Dr. H. B. Stenzel
Bureau of Economic Geology
University of Texas
Austin, Texas.

Dear Dr. Stenzel:

Enclosed you will find the brachiopods that I mentioned earlier. The cover glass is loose on one of the slides, so be careful in taking off the rubber band. They are mounted in gum tragacanth, and will come loose if moistened. Hope they will be of some use to you.

Just received the preview of your card catalog and they look fine--- much better than the Devonian cards. You are to be congratulated in bringing out a much needed set. We are ordering a set in the morning, as well as the Navarro paper.

Looking forward to seeing you again at Houston, soon.
With best wishes,

Sincerely yours,

Alfred R. Loeblich
