

452 College Avenue  
Norman, Oklahoma  
January 25, 1946

Dear Dr. Stenzel:

Going down to S.E. Okla next  
Monday or Tuesday— giving it a chance to dry  
off a bit.

I'll do my best to get type material of those  
two species in that area— also types of  
G. washitensis from H. Washita in addition.

Sincerely  
A.R. Lublich.
