Dear Ray:

Your letter of January 24 catches me with half a leg in the jeep. I didn't know about the 24 gratis copies; suppose I should have checked with you first. I suggest all of the authors pool their distribution lists after it is known, how many copies each of us entitled to. I suppose something like this must have been done by authors of previous volumes. So you will be able to advise from experience, how best to avoid duplication of distribution.

I am off on my last major field trip up north and expect to be back February 21. But mail will probably reach me once or twice during this time.

I expect to be back in the States sometime around June 1.

With best regards,

Sincerely yours,

Curt Teichert
