

THE UNIVERSITY OF KANSAS
DEPARTMENT OF GEOLOGY
LAWRENCE

29 September 1953

Dr. H. B. Stenzel
3105 Kerbey Lane
Austin 3, Texas

Dear Henryk:

I want to acknowledge and thank you for writing to me, the letter sent under date of 31 August. It was a newsy report of your work in the Gulf Coast area and I am desirous of keeping up with research you are doing and that being undertaken with your guidance. I am surprised to hear that graduate students there in Austin are less numerous than formerly and that you have only a couple who are taking advantage of the opportunity to study under you. That is lamentable. Perhaps you should come to Kansas where currently we have some 32 graduates working on M.S. degrees and 15 candidates for the doctorate in various stages of their work. Nearly all of these are busy in aspects of stratigraphic paleontology or paleoecology. I was very much interested to hear of Charlie Bell's transfer to Texas and I am sure that he will be a big asset to the department.

I look forward to seeing you at Toronto for in spite of distance, I assume that you will be there. For my report concerning the Treatise project I would like to know whether your commitment on clams has been completed.

With cordial personal regards, I am

Sincerely,

Raymond C. Moore
