

October 22, 1951

Dr. Norman D. Newell
Curator, Fossil Invertebrates
The American Museum of Natural History
Central Park West at 79th Street
New York 24, New York

Dear Norman:

In reply to your letter of October 18, 1951, at this time the weather in Texas is just fine for field work and I need to get a lot of field work done before my teaching starts again. So I am not coming to the G.S.A. meeting this year.

As to my work on the Ostreidae, I am at it whenever there is time available and hope to finish around Christmas.

With best personal regards,

Sincerely yours,

H. B. Stenzel, Geologist
