Dear Stenzel:

Doubtless you think that I am flooding you with letters but I am now writing to inquire if you included the work of Steepin, Gabb and other paleontologists with appropriate references to their works in the introduction of the paper. If you have not done so please do this at once and send to me so that I can do it the next time I pass through Austin.

As I called this to your attention in a previous letter I assume that you have probably done this but I wish to be sure so please advise me.

Sincerely yours,

B. Coleman Penick.
