Mr. Clay Seward  
Geology Department  
A. & M. College  
College Station, Texas

Dear Clay:

We plan to let the students map the Cook Mountain formation in northern Brazos and adjoining Robertson County this summer. For this purpose we will need new aerial photos, but we don't know the numbers. Can you do me the favor of going to the federal agricultural building and of finding out which photos we can have to order? I would appreciate it greatly as time is getting short again. Ellison and I had originally planned to drive down to A&M to find out ourselves, but we can't find the time--always something has turned up in the last moment.

Best regards.

Sincerely yours,

H. B. Stenzel
