University of Texas
Austin, Texas

Dear Henryk:

Your paper on Wilcox stratigraphy was a valued contribution to the program of our 18th Annual Meeting. The thoroughness of attack, which is so characteristic of all your work, impressed your listeners very much, and the ideas advanced were quite stimulating. The necessity of zoning the Wilcox in subsurface is becoming more pressing every day, and your surface subdivisions at least furnish a starting point.

We appreciate very much your kindness in presenting this paper. Many thanks.

Sincerely,

John R. Sandidge

JRS-EB
