MAXWELL SMITH

Photographic Laboratory

October 23, 1935

Mr. H. B. Stenzel
Austin, Texas.

Dear Mr. Stenzel:

I arrived home a few days ago and the first package to be opened contained the fossils you sent me some months ago. I am very much pleased with the specimens and appreciate your care in choosing the forms I am particularly interested in studying. I am particularly pleased with the members of the Volutidae, the Turrids and the many peculiar genera which open an entirely new world to me.

The specimens you sent for identification will have my attention at the earliest possible moment. I am swamped with work in connection with opening the house and putting the grounds in shape. I shall later send you some additional material from the Clewiston area.

Again thanking you for the fine shells, I am,

Sincerely yours,

Maxwell Smith
