

123. rue Clovis
Rheims, Marne
France

Dec. 24. 1931

Dear Sir,

Your parcel arrived
in perfect condition and
I am much obliged to
you for the fine series
you sent me - All your
specimens are very interesting
and I am anxious to
make further exchanges
with you.

To-day I am
sending in 2 small
boxes 63 sets, all of your
desiderata, except one: Lucina

gibbosula of which my
2 last duplicate valves got
crushed, but I shall be
able to let you have that
sp. later - To make up,
I have added one example
of Rostellaria (*Gladus*)
~~Marceana~~ from the
Paleocene or "Thanetian" of
Toucheville-sur-Vesle (Marne).
It is a rare sp. & I hope
it may be useful to you.

I already possess
some fossils from
Claiborne, but I shall
be glad to enlarge my
series. If you send me
your complete list of
duplicates, I will let
you know what I
can use.

Enclosed you will find an
other small list of my duplicates, this
time from the lower Eocene or Transition

Thanking you again for your
fine shells, please accept my best wishes
for the approaching festivities of Xmas and
New Year.

Sincerely yours

J. S. Stead

P. C. - Thanks for
addresses: S. C. Field
& M. E. Caruthers are
both good old cor-
respondents of mine.

J. S. Stead

Duplicate sp. from the French middle Eocene.
