Dr. H. B. Stenzel,
3105 Kerbey Lane
Austin 21, Texas.

Dear Dr. Stenzel:

I was glad to hear from you again, but was sorry to learn that the bureau will not move forward with a new administration.

I believe that the plans are pretty well laid for a replacement here in invertebrate Paleontology. You may know that Dr. Clark has retired and the poor fellow has a very short time to live. I was quite surprised to discover this upon my return from South America.

Living conditions in Bogotá are extremely crowded and high. I should say considerably higher than in the U.S. I should insist on the company finding me suitable living quarters. Some families enjoy living in foreign countries and like their work but others do not. There are American schools but I am not at all familiar with their system.

It was too bad about Hesse. What are their plans for continuing work in Vertebrate Paleontology?

With kindest regards,

R. A. Stirton

R. A. Stirton.
