

June 27, 1946

Mr. T. M. Stout
The University of Nebraska
Department of Geology
Merrill Hall
Lincoln, Nebraska

Dear Mr. Stout:

Thank you for your interesting letter of June 16. It seems we are agreed that these vertebrates are of paramount importance for exact stratigraphic tie-in. Hence, I am glad to send you the material for study. Please return it to me after you have finished with it. The skull came from one of the concretions of bed (H) at locality 175-F-1, comp. p. 986 + 990 of American Association of Petroleum Geologists Bulletin, vol. 28, no. 7, 1944.

One reason why I have gone to considerable trouble in locating this material is the fine cooperation I have received in the past from the American Museum of Natural History, for which I am grateful. Except for a few favored gentlemen we in Texas have a lot of difficulties in doing our work.

Sincerely yours,

H. B. STENZEL
Geologist
