Prof. H. B. Stenzel,
Geological Institute,
University of Houston,
Houston,
Texas,
U.S.A.

Dear Prof. Stenzel,

I am now working on some Upper Cretaceous Gryphaeas which occur in the Mifune group of Kyushu, Japan and may belong to your Texigryphaea.

I have read your report "Cretaceous oysters of Southwestern North America" read at International Geological Congress in Mexico.

I would be very grateful for sending me your publications on Cretaceous Gryphaeas. I am now sending you some papers on Mesozoic pelecypods of Japan by sea mail.

Please accept my cordial regards,

Yours sincerely,

M. Tamura
