Dr. H. B. Stenzel
Bureau of Economic Geology
The University of Texas
University Station, Box B
Austin 12, Texas

Dear Dr. Stenzel:

Thanks for your letter of December 11, telling us of your safe return from your recent Florida visit. We are continuing to have the nasty weather that has been all too prevalent recently.

Both Dr. Vernon and I appreciate very much your coming over, for your presence meant much to each of us on this field trip. As is often the case, differences of opinion arise in interpreting the geology of certain areas and for this reason it seemed to both of us opportune to have the area visited by, not only those more or less familiar with the problem in general, but also those who can assist in unraveling complexities through detailed training in a specialized field. I believe the field trip will result in being able to publish a more creditable report than would have been the case otherwise, and our thanks go to you for your share in making this possible.

With the Christmas Season's greetings,

Very sincerely yours,

A handwritten signature in cursive script that reads "Herman Gunter".

Herman Gunter
