Mr. Wm. T. Watkins
621 Nolan St.
San Antonio, Texas

My dear Mr. Watkins :

We have been asked to collect additional material of that fossil jellyfish from the original Kirkland locality. I presume there are many more slabs at that place. Do you know of anyone in Fort Worth or Dallas who would be willing to go with me and who knows the locality?

With best wishes,

Sincerely yours,

H. B. Stenzel, Geologist
