Dr. C. E. Weaver  
Department of Geology  
University of Washington  
Seattle, Washington

Dear Dr. Weaver:

I am happy to notice that you are pleased with the samples from Texas.

Should you be interested in material from Texas, Cretaceous or Tertiary, I would be glad to send you some. I notice that you are kind enough to get a collection of northwestern Eocene together. Please do not forget that I am very much interested in fossil crabs.

With best regards,

Sincerely yours,

H. B. Stenzel, Geologist
