

July 3, 1937

Mr. T. H. Withers
British Museum (of Natural History)
South Kensington
London

My dear Mr. Withers:

I am sending you by separate mail some barnacle plates from the Weches formation of Smithville, Bastrop County (Bureau of Economic Geology locality 11-T-2). These are for identification. Should you want to keep some of these plates I am sure we can get to an agreement on them later on.

Very sincerely yours,

E. B. Stenzel, Geologist
