

618 Texas Co. Bldg
Houston, Texas.
Jan. 6, 1935.

Mr. H.B. Stenzel,
Bureau of Econ Geol.,
University of Texas,
Austin, Texas.

Dear Mr. Stenzel:

My company is interested in the surface geology of several counties near Brazos, i.e. Walker, Leon, Grimes, Burleson, etc. In order to tie in some of the formations of these counties we are going to make some trips to Brazos Co. If it is not asking too much I would to know of some of the localities in Brazos Co. where the following may be seen: the Wellbourn sandstone, the Silworth sandstone, and the contact of the Silbell and Cockfield formations.

I was surely sorry that I couldn't come to Austin for the 75th Anniv. celebration, but I started my vacation at that time and went to South Carolina. I looked in some of the book stores in Columbia for some of the books which

are on your ^{want} list but couldn't find a thing on
geology. I collected some Tertiary fossils and some
fossils earth from some of the ~~oldest~~ ^{first} known
deposits ~~of~~ in the county.

Professor Wallace was in town and stayed
several days with me ^{this fall}. He got a job with the
Texas Co. on a geophysical crew and worked
up to a Computer. They ~~have~~ sent him to
Los Angeles, Cal. where he is now is. Garcia
is working for us as sample washer.

If I can help you in getting any information
or subsurface samples of anything in this
region, please don't hesitate to call on me.
Give my regards to Mr. Sillards, Miss Casey, and
others of the Bureau Staff.

Sincerely yours,
M. N. Broughton.
