Mr. Jack Ammann  
829-31 N. St. Mary's Street  
San Antonio 2, Texas

Dear Mr. Ammann:

I would like to thank you for your kind offer to help out with maps.

Students in my course of Cenozoic Stratigraphy number 36. In this course they become acquainted with and use aerial photographic maps for the first time, and these maps make a great impression on them. We are greatly in need of an accurate topographic map of Bastrop and Lee counties, and if such a map is now available, you would do us a great favor by donating it. We use various aerial photographic sheets of Bastrop County on these field trips. The ones we use were made by Edgar Tobin.

There should be no objection to a statement "This map donated by ....." on any sheets you might want to furnish for the use of my class.

Very truly yours,

H. B. Stenzel  
Professor of Geology, and  
Geologist, Bureau of Economic Geology
