Dear Steered:

As president of the section of Tectonophysics of the Geological Union I am writing to our members to remind them of the fact that the section and the Union are in need of their support. We are trying to appoint a permanent, paid, full-time secretary after Dr. Fleming has given his time for almost 20 years. In addition the transactions are to be changed into a bi-monthly journal in order to distribute the load through the year and to improve the service. If the members raise about 5000 \$ we will receive outside help and have enough money for 3 years and until the journal pays for itself.

If you care to send a contribution, a check to Dr. Fleming 5241 Broad Branch Rd NW Washington D.C. will take care of it.

Wishing you a happy  
New Year

Sincerely

Ernest Cloos
