Dr. C. W. Cooke
U. S. Geological Survey
Washington, D. C.

Dear Dr. Cooke :

Your letter of February 24 has been received. I shall be very glad to send you the type specimens of Lower Cretaceous echinoids which are available at the Bureau. However, I must confess that I will be rather slow in this matter because I am supposed to be in the field most of the time and do not have much time on my short visits in Austin. Nevertheless I believe I will be able to supply you faster than you can work the material up. May I suggest that you write also to Dr. F. L. Whitney who has some of the types of Cragin's, I believe.

Your latest publication on the Cenozoic echinoids is certainly very interesting, and I am glad you are taking pains to straighten out that complicated group for us other workers.

With best regards,

Sincerely yours,

H. B. Stenzel, Geologist
