

Cambridge

27. xii. 73

Dear Emmett,

We seem to have heard little of you for a long time and hope all is well with you and yours. Jean-Pierre also complains he has no communication with you. I expect that you, like me, find little time for letter-writing except when something needs to be done.

My secondary motive in writing is to say that Documents ed. 2. was published on 20th December. I asked the Press to send a review copy to NESTOR, but since this is handled through their New York office I am not too sure it will be done. However, if after a reasonable lapse of time a copy does not reach your desk, please let me know and I'll repair the omission. You will appreciate that at \$ 37.50 a time I can't afford to duplicate review copies. The Press have not been at all generous with complimentary copies.

I got back from 3 months in Greece at the beginning of this month. On the whole a useful operation, since I (and my long-suffering car) have been to many places I haven't seen before. Joan was with me most of the time. My lectures at the University of Athens were curtailed by student riots followed by a coup - a distinct bore. There is much enthusiasm there for Myc: studies, and Kourmoulis, who is Πρόεδρος of the new University of Rethymnon wants me to go and help found a department of prehistoric studies there!

Anthony is now a student here reading geography.

I wonder what you thought of my former pupil
Cynthia Shelmerdine's article on Ma in AJA,
we think here she's a very bright girl. She is
now doing her Ph.D. at Harvard.

All best wishes for 1974 from us all
to you all.

Yours,

John
