Dear Dr. Bennett:

I sent you the Pylos sheets on the 29th by registered mail and trust they have reached you safely. Now that I've had my first real look at the material and can appreciate its richness, I feel more than ever the debt of gratitude I owe you for giving me a preview of it. And I can also appreciate the beautiful job of arranging it you have done: it couldn't possibly be easier to handle than it is now. I'm still at my indexes, more B to go and A coming up - a long dreary job, as you discovered long ago. Meanwhile I can't wait to start playing around with those tantalizing Pylos formulae.

Thank you very much for the offprint of your excellent AJA article. I am very happy to have it.

Sincerely,

Jane Henle.
