

Contour Interval - 1.0 km  
 (local supplemental contour interval - 0.5 km)  
 All supplemental contours labeled  
 Datum = Sea Level

Contours solid where structure well constrained by reliable data on depth to basement as determined from well and seismic reflection data.  
 Contours dashed where data poor or lacking - depth to basement estimated.

Depths to Basement in Yucatan Basin drawn from E. Rosencrantz (unpublished 1987)

AUGUST 1990

## DEPTH TO BASEMENT GULF OF MEXICO REGION
