Dr. H. B. Stenzel
Shell Oil Company
Geological Department
Houston, Texas

Dear Dr. Stenzel:

I have just finished a fast sand and gravel reconnaissance, for my present employer Southern Pine Lumber Co, in northern Jasper County. During the work I became intrigued with the geology of the area and read as many treatises as I could find on that area. The literature of 1918 and later is vague as to the different formations and members.

My question is--has any MA or PhD work been done that might cover this portion of the country and if so, who and in what library would they be filed.

I am enclosing a county road map of the area of interest. The scale is 1" to 2 miles. The "G"s are deposits of gravel and sand that I found. I am sure there are more, but the time factor limited my travels.

If you get through Diboll, Texas one of these days be sure to drop in for a visit.

Your long lost East Texas friend,

Walter M. Fitzgerald
