

SUSUKI

April 30, 1963

Mr. Takeo Susuki, Curator
Geology Department
University of California Los Angeles
Los Angeles 24, California

Dear Mr. Susuki:

Thank you very much for sending me the two giant
Miocene oysters. They are exactly what was needed. Both
show the yearly layers on the ligamental area very well
and will make good photographs.

With thanks,

Sincerely yours,

H. B. Stenzel
