Dear Doctor Stenzel:

Several days ago, I sent you unannounced the mold and impression of a crab, from the bauxite area near Little Rock, Arkansas. The bauxite report is now, at long last, about to be written and I am sure the men writing it will greatly appreciate any information you can give them on the crab.

I hope that all the Stenzels have an interesting summer ahead. The girls must be young ladies now. Please remember me to them and to Mrs. Stenzel. I would very much like to see them again.

Sincerely yours,

Julia Gardner
