Dear Henryk:-

Tomorrow night I get rid of the local S.E.P.W.

I suggested to the nominating committee they get some younger men who might give a damn. I'm sure I don't. So will end a lackadaisical year and I hope, my political career.

The sunny side of the meetings is that I will get to see Moody and I hope Weaver, as he appears on the program.

I am surprised and chagrined not to get a report on your triumphs and tribulations at the last meeting. What happen?

Have kinks galore in the neck from the microscope. Took yesterday off to rest the neck.

Am submerged in this damn taxonomy. However will do the best I can. It doesn't seem so important as it did 25 years ago. Certainly I admire Cushman as more as I go thru his papers. Quantity seems to have been his goal.

I regret to say I enjoyed the Initial number of the Cushman Memorial. It was different.

It has been quite hot, about a month late. We had 3 days running over a hundred.

Keep plugging.

With best wishes,

Merle
